Explanation of proposed changes or new programs. Attach additional page if necessary: <p>In the mid-1990s the Jackson School structured its interdisciplinary minors around courses drawn from many UW departments. The detailed catalog statements allowed students and their advisers in other units to navigate the School's 14 minors without having to refer to additional documents or obtain rulings on which courses could be counted. Although this approach involved frequent applications to change minors because of new courses, number changes, etc., we judged it to be worth the effort to achieve minors that were normally self-explanatory for students and advisers.</p> <p>By now the universal acceptance of web-based information about requirements has largely eliminated the rationale for that approach. The current application leaves the coursework of the minor unchanged, but replaces detailed citation of courses with references to lists that will be maintained on a web page. We believe the result will be equally acceptable for advising (and self-advising) purposes, and far simpler from an administrative standpoint.</p>
