Re: Delay of degree requirement changes

Last fall, we requested to have changes made to the Astronomy Bachelor of Science requirements in response to changes that were occurring in the Physics Department. Since that time, the Physics Department has made additional changes requiring us to make additional revisions. The majority of our majors are also physics majors and we would like to implement the changes in the same quarter. Therefore I am requesting that our approved degree requirement changes, effective winter 2009 be delayed until spring 2010. Thank you.
