

OFFICE OF THE PRESIDENT

November 10, 2009

Dean Matthew O'Donnell College of Engineering Box 352180

Dean Ana Mari Cauce College of Arts and Sciences Box 353765

Dear Matt and Ana Mari:

Based on the recommendation of its Subcommittee on Admissions and Programs, the Faculty Council on Academic Standards has recommended approval of the revised admission and program requirements for the Bachelor of Science degree in Computer Science. A copy of the changes is attached.

I am writing to inform you that the Department of Computer Science and Engineering is authorized to specify these requirements beginning spring quarter 2010.

The new requirements should be incorporated in printed statements and in individual department websites as soon as possible. The *General Catalog* website will be updated accordingly by the Registrar's Office.

Sincerely yours,

Man

Mark A. Emmert

President

Justification of Change to Computer Science Program

This change encompasses a significant revision of the department's 300-level courses for students in the Computer Science and Computer Engineering majors. This is the most significant revision to the courses in over two decades. It results from a large committee effort and broad faculty/student input that began in earnest in January 2009. Students beginning the major in Spring 2010 or later will use the new courses and requirements.

Goals

The purpose of this revision is to *streamline* and *modernize* our undergraduate degree programs. We are responding to a computing field that continues to grow and advance at a fast rate. For streamlining, our goal was to reduce the number of courses all students must take so that students have the opportunity (but not the requirement) to take more advanced courses in a particular subfield sooner. We have not reduced the total number of CSE courses/credits that each student must take. That is, the degree is more flexible, but not smaller. For modernization, the new 300-level courses have roughly 30% new material, replacing material that has become less important. Before the revision, the Computer Science degree and the Computer Engineering degree required the same 300-level courses. There is now a 1-2 course difference in which courses are required, but there are still 4 courses that all students take, and in practice we expect even larger overlap once we consider courses that students take as electives.

New Courses

The degree-requirements revision is accompanied by 8 new courses (CSE 311, 312, 331, 332, 333, 344, 351, 352). Correspondingly, we will phase out 6 courses (CSE 303, 321, 322, 326, 370, 378) after a transition period over the next few academic quarters since current students have already taken some or all of these courses. The numbering scheme for the new courses is straightforward:

- Courses with a middle number of 1 focus on foundational material used across the discipline.
- Courses with a middle number of 3 focus on software.
- Courses with a middle number of 5 focus on hardware or the hardware/software interface.
- 344 relates closely to the current course 444 (see the new-course application for 344).

Degree Requirements

The degree requirements that follow this justification are largely straightforward. Because we are requiring 5 300-level courses instead of 8 (including the statistics requirement), the number of elective courses and credits increase correspondingly. The credits in the major total 90.

To simplify the presentation, we have created a new named list of courses called the "CSE Core Course List" that will appear in the CS&E Handbook. This list makes the requirements easier to read than the old approach of including a long list of 400-level courses directly in the requirements. This change is not substantial, especially because all changes to this list in the future will have to be approved via the 1503 process. The CSE Core Course List does include the following small changes:

- It includes the new courses that are not required for the degree (CSE 333, 341, 344, 352).
- It includes CSE 446, a recently added course on data mining.
- It includes STAT 391 as one of many options. (This inclusion was discussed with representatives of the Statistics department. Note STAT 391 is titled, "Probability and Statistics for Computer Science.")

Course Lists

The degree requirements refer to 3 course lists from the CS&E Handbook. Copies of these lists are included as appendices.

- The CSE Core Course List is a new list, as explained above.
- The CSE Electives List used to be called the "CSE Senior Electives List" but we have renamed it to reflect that it includes some 300-level CSE courses. It also has several small changes, listed below. The additions and removals better align the list with the criteria described at the beginning of the list. Note we also have a petition process for including other courses.
 - Additions: AMATH 482, MATH 307, STAT 390, STAT 391
 - Removals: GEOG 460 (no longer exists), GEOG 463 (no longer exists), HCDE 401
- The only change to the Approved Natural Science Course list is to reflect that BIOL 180 no longer has a chemistry prerequisite.

Changed Prerequisites

Because we are transforming the entire 300-level curriculum, the prerequisites for many of our other courses will need to change. This will occur in two stages: During a transition period, the prerequisites will account for students taking old or new 300-level courses. Later we will remove references to the old courses.

This 1503 does not implement either of these stages. Instead, we seek to put our new degree requirements and courses in place first. After this is completed and the new courses are in the catalog, we will make the changes to our prerequisites. For informational purposes to show that we have thought through the changes, a draft of the prerequisite changes is included as an appendix.

There is no need to do either stage now because no student can complete any new courses until Spring 2010.

Affected Departments

This curriculum revision primarily affects only the CSE department and its undergraduate majors, though there are a few external interactions. We have removed the requirement of a statistics course, while still allowing STAT 390, 391, or 395 to count toward CSE elective credit and including STAT 391 as an option on the new "CSE Core Courses List" described above. We met with relevant members of the Statistics department to explain the changes and they expressed no particular problems with these changes. We have also consulted with Electrical Engineering and Mathematics about courses that are closer to those disciplines (CSE 352 and CSE 311, respectively).

Computer Science

Undergraduate Program

Adviser 101 Paul G. Allen Center for Computer Science and Engineering, Box 352350 206-543-1695 ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:

- The Bachelor of Science degree with a major in computer science
- The Bachelor of Science degree with a major in computer engineering (see Computer Engineering section)

The core requirements of the two undergraduate majors are **identical**. The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the theory, design, and implementation of software systems and applications (for example, the techniques of modern compilers or the algorithms behind computer graphics and animation).

The computer engineering major may be more appropriate for students who are interested in creating and building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints. The program includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole.

Bachelor of Science

Department Admission Requirements

Applicants are considered in three groups: Direct Admission, Accelerated Admission, and Upper-division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

1. Direct Admission: Computer Science and Engineering enrolls up to 20 percent of

its incoming class directly out of high school, prior to the completion of university-level prerequisites. Freshman applicants to the University listing computer science or computer engineering as their intended major are automatically considered. Competitive applicants have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.

- 2. Accelerated Admission: Intended as a fast track into the Computer Science and Engineering department for matriculated students who have excelled in the CSE introductory courses.
 - a. Course requirements: CSE 142 or equivalent, CSE 143. At least five additional credits toward the Computer Science Upper-division Admission course requirements.
 - b. Other requirements: Completion of at least 15 credits at the UW. 3.00 cumulative GPA. Competitive applicants for accelerated admission typically have received a high grade in CSE 143 at the UW on their first attempt.
 - c. Admission is considered for any quarter.
- 3. Upper-division Admission
 - a. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); at least five credits of Natural World, including one of the following: PHYS 121, CHEM 142/CHEM 145, (or any approved science course that requires PHYS 121 or CHEM 142/CHEM 145 as a prerequisite); CSE 142, CSE 143; and at least five credits of English composition. In addition to any AP credit, at least one calculus or post-calculus mathematics course and one approved Natural World courses must be completed prior to applying to the department.
 - b. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

Students may also declare into the computer science degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

Major Requirements

84-87 credits as follows:

- 1. Science (10 credits): 10 credits from the list of approved natural science courses in the CS&E Handbook. Courses that meet the department's science requirement include PHYS 121, CHEM 142/CHEM 145, and any course in biology, chemistry, physics, earth and space sciences, astronomy, and atmospheric sciences that requires PHYS 121 or CHEM 142/CHEM 145 as a prerequisite.
- 2. Mathematics (19-22 credits): MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136)

- taken); MATH/STAT 390 or MATH/STAT 391.
- 3. Required Courses (35 credits): CSE 142, CSE 143, CSE 303, CSE 321, CSE 322, CSE 326, CSE 341, CSE 370, CSE 378.
- 4. Senior Electives (minimum of 20 credits): At least 20 credits from the senior electives courses listed in the CS&E Handbook, including at least four of the following courses: CSE 401, CSE 403, CSE 421, CSE 427, CSE 431, CSE 440, CSE 444, CSE 446, CSE 451, CSE 455, CSE 457, CSE 461, CSE 466, CSE 467, CSE 471, CSE 473, CSE 484.
- 5. Minimum 2.0 grade for any course applied to the major. Transfer students must earn a minimum of 24 graded credits toward the major at the UW.

 - b. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

Students may also declare into the computer science degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

Major Requirements

87-90 credits as follows:

- 1. Science (10 credits): 10 credits from the list of approved natural science courses in the CS&E Handbook.
- 2. *Mathematics* (<u>15-18</u> credits): MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken).

- 3. Required Courses (<u>29</u> credits): CSE 142, CSE 143, <u>CSE 311, CSE 312, CSE 331, CSE 332, CSE 351</u>.
- 4. Senior Electives (minimum of 33 credits): At least 33 additional credits from courses on the approved CSE Electives list in the CS&E Handbook, including at least:
 - 6 courses from the CSE Core Courses list in the CS&E Handbook of which 4 courses must be CSE 400-level courses
 - <u>Either 1 additional course from the CSE Core Courses list or 1 course</u> from the CSE Capstone list in the CS&E Handbook
- 5. Minimum 2.0 grade for any course applied to the major. Transfer students must earn a minimum of 24 graded credits toward the major at the UW.

Appendix: Course Lists

The degree requirements refer to 3 course lists. This page lists the new CSE Core Course List. On the following pages are the revised CSE Elective List and the (unchanged) Approved Natural Science Course List.

CSE Core Course List

(See notes below as necessary.)

- CSE 331 Software Design & Implementation (1)
- CSE 333 Systems Programming (2)
- CSE 341 Programming Languages
- CSE 344 Intro to Data Management
- CSE 352 Hardware Design & Implementation (3)
- STAT 391 Probability & Statistics for Computer Science
- CSE 401 Intro to Compiler Construction
- CSE 403 Software Engineering
- CSE 421 Intro to Analysis of Algorithms
- CSE 427 Computational Biology
- CSE 431 Intro to Complexity
- CSE 440 Intro to HCI
- CSE 444 Intro to Database Systems
- CSE 446 Machine Learning
- CSE 451 Intro to Operating Systems
- CSE 455 Computer Vision
- CSE 457 Computer Graphics
- CSE 461 Computer Networks
- CSE 466 Software for Embedded Systems
- CSE 467 Advanced Digital Design
- CSE 471 Computer Design and Org
- CSE 473 Artificial Intelligence
- CSE 484 Computer Security
- (1) Required for Computer Science and Computer Engineering Software Specialization; therefore does not count as elective credit for Computer Science or the software specialization.
- (2) Required for Computer Engineering Hardware Specialization; therefore does not count as elective credit for this specialization.
- (3) Required for Computer Engineering; therefore does not count toward elective credit for Computer Engineering

CSE Electives List

A CSE elective is a course that has a significant overlap with computer science and engineering, either because it focuses on a significant application or use of computers, it focuses on an underlying technology for computers or communication, or it develops a conceptual or formal framework useful in doing computer science and engineering.

Courses not on this list may be applied toward CSE (senior) electives if approved by the CSE Undergraduate Faculty Advisor. If you would like to petition to have a class count toward (senior) electives, please contact the undergrad advisors.

Note: Computer Engineering majors may not use the same course to satisfy Math/Science electives and Computer Engineering or Free Electives.

Any course on the CSE Core Course List is also a CSE Elective

Any graded 400-level CSE majors course is a CSE Elective (includes 498 but not 499)

Courses from other departments:

AMATH	401 402 403 422 423 482	Vector Calculus & Complex Variables (4) Introduction to Dynamical Systems & Chaos (4) Methods for Partial Differential Equations (4) Introduction to Mathematical Biology (3) Mathematical Biology: Stochastic Models (3) Computational Methods for Data Analysis (5)
BIOEN	303 485	Bioengineering Signal Processing (4) Computational Bioengineering (4)
DXARTS/ MUSIC	461-46	Digital Sound, Digital Sound Synthesis, Digital Sound Processing (5, 5, 5). Offered jointly with Music 401-403.
EE	331, 33 341	Devices and Circuits I & II (5, 5) Discrete Time Linear Systems (5)
EE		vel Any 400-level majors course with the exception of: EE 406, 452-457, 471, 472, 478, 491, and 499.
ENGR (Co-op) 321	Engineering Cooperative Education (one credit may count for Computer Science majors; three credits may count for Computer Engineering majors)
GEOG	465	GIS Database & Programming (5)
HCDE HCDE/IE	407 455	Software User Assistance (5) User Interface Design (4)

              491
```

Note: Only one of STAT 391 and MATH/STAT 390 may count toward CSE Elective credit.

Approved list of science courses for CSE

Courses that meet the department's science requirement include Physics 121, Chemistry 142/145, Biology 180 and the following list of courses.

Check with a CSE adviser about courses that are not included in this list, but which require Physics 121, Chemistry 142/145, Biology 180 as a pre-requisite.

Biology

BIOL 180 BIOL 200 BIOL 220

Must take one of the three above as a prerequisite to the following (when required) BIOL 325, 333, 340, 354, 355, 356, 401, 402, 403, 405, 407, 408, 409, 411, 412, 413, 414, 415, 425, 426, 427, 433, 434, 435, 437, 440, 441, 442, 443, 444, 446, 452, 454, 455, 459, 462, 463, 464, 471, 472, 473, 474, 475, 476, 477, 479, 480.

Chemistry

CHEM 142, 144, 152, 155, 162, 165, 220, 221, 223, 224, 237, 238, 239, 241, 242, 312, 317, 321, 335, 336, 337, 346, 347, any graded 400 level CHEM course

Physics

PHYS 121, 122, 123, 224, 225, 227, 228, 231, 232, 311, 315, 321, 322, 323, 324, 325, 328, 331, 334, 335, 407, 408, 421, 422, 423, 424, 425, 426, 434, 460.

Earth & Space Sciences

Appendix: Subsequent Prerequisite Changes

As explained in the justification, the new 300-level curriculum necessitates changing the prerequisites for 400-level courses in two stages. Though we are not implementing either stage now, this information indicates how the pre-requisites will change.

Course	Current	Stage 1	Stage 2
CSE 373	CSE 143, no credit after 326	CSE 143, no credit after 326 or 332	CSE 143, no credit after 332
CSE 374	CSE 143, no credit after 303	CSE 143, no credit after 303 or 333	CSE 143, no credit after 333
	CSE 322, 326, 341, 378, no credit	(CSE 326 and CSE 378) or (CSE 332 and	
CSE 401	after 413	CSE 351)	CSE 332, CSE 351
1		(CSE 303 or CSE 331) and (CSE 326 or	
	CSE 303, 326, 341, project	CSE 332), project experience	
CSE 403	experience recommended	recommended (331 qualifies)	CSE 331, 332
CSE 410	CSE 373, no credit after 378 or 451	CSE 373, no credit after 378, 351, or 451	CSE 373, no credit after 351
		(CSE 322 or CSE 312) and (CSE 326 or	
CSE 421	CSE 322, 326	CSE 332)	CSE 312, 332
CSE 427	CSE 326	CSE 326 or CSE 332	CSE 312 and CSE 332
		(CSE 303 or CSE 331) and (CSE 326 or	
CSE 428	CSE 326	CSE 332)	CSE 331 and CSE 332
CSE 431	CSE 322	CSE 322 or CSE 312	CSE 312
CSE 440	CSE 326	CSE 326 or CSE 332	CSE 332
			CSE 332, (CSE 344 or permission of
			instructor), recommended: CSE 331 or
		(CSE 303 or CSE 331) and (CSE 326 or	CSE 333 or substantial software-
CSE 444	CSE 303, 326	CSE 332)	project experience
	CSE 326 and (STAT 390 or STAT	(CSE 326 or CSE 332) and (STAT 390 or	CSE 312, CSE 332, recommended:
CSE 446	391)	STAT 391 or CSE 312)	STAT 390 or STAT 391
		(CSE 378 or CSE 351) and (CSE 326 or	
		CSE 332), recommended: CSE 303 or	CSE 332, CSE 351, recommended:
	CSE 326, 378, no credit after CSE	CSE 333, no credit after CSE 410 or EE	CSE 333, no credit after CSE 410 or
CSE 451	410 or EE 474	474	EE 474
CSE 454	CSE 326	CSE 326 or CSE 332	CSE 332

CSF 455	CSE 303, CSE 326, recommended: MATH308	(CSE 303 or CSE 333) and (CSE 326 or CSE 332), recommended: MATH308, STAT 391	CSE 333, CSE 332, recommended: MATH308, STAT 391
CSE 457	CSE 303, CSE 326, recommended: MATH308	(CSE 303 or CSE 333) and (CSE 326 or CSE 332), recommended: MATH308	CSE 333, CSE 332, recommended: MATH308
CSE 461	CSE 326	(CSE 326 or CSE 332) and (CSE 303 or CSE 351); recommended CSE 303 or CSE 333	CSE 332, CSE 351, recommended: CSE 333
CSE 466	CSE 326, CSE 370, CSE 378	(CSE 378 or CSE 352) and (CSE 303 or CSE 333)	CSE 352, CSE 333
CSE 467	CSE 326, CSE 370	(CSE 370 or CSE 352) recommended: (CSE 326 or CSE 332)	CSE 352, recommended: CSE 332
CSE 468	CSE 370	CSE 370 or CSE 352	CSE 352
CSE 471	CSE 370, CSE 378	CSE 378 or CSE 352	CSE 352
CSE 472	(LING200 or LING400) and (LING461 or CSE 321), joint with LING472	(LING200 or LING400) and (LING461 or CSE 321 or CSE 311), joint with LING472	(LING200 or LING400) and (LING461 or CSE 311), joint with LING472
CSE 473	CSE 326, recommended: 341	(CSE 326 or CSE 332), recommended: STAT 390 or STAT 391 or CSE 312	CSE 312, CSE 332, recommended: STAT 390 or STAT 391
CSE 481	CSE 326, 341, 378, substantial programming experience, such as in CSE 451 or CSE 457	(CSE 341 or CSE 331) and (CSE 326 or CSE 332) and (CSE 378 or CSE 351), substantial programming experiences, such as in CSE 451 or CSE 457	CSE 331, 332, 351, substantial programming experience, such as in CSE 451 or CSE 457
CSE 484	CSE 326, 378	(CSE 326 or CSE 332 or CSE 312) and (CSE 378 or CSE 351)	CSE 312, 351
